

Carleton Place Public Library Seed Donation Form

To ensure that our collection of seeds packets are healthy and labeled correctly, we kindly ask that you donate seeds following these guidelines.

How to Donate Seeds

1. Please save your seeds from healthy plants, this encourages disease resistance.
2. Try to save seeds from several plants so the seed has some genetic diversity in it, for self-pollinating plants less plants are necessary, for cross pollinating you want to save from a larger population of plants.
3. For a cross pollinating plant make sure to keep it isolated so it stays “true to type.” Check with a seed saving chart or book to learn isolating distances.
4. Bring your cleaned, dried seeds into the library in an envelope and fill out our seed donation form to provide us with relevant information.
5. Thank you for donating seeds to the library!

Seed Information: Please complete to the best of your knowledge

1. Common name:
2. Variety:
3. Days to maturity (sprouting):
4. Location/Date of Harvest:
5. Does this plant cross-pollinate with other varieties? (yes/no/don't know):
6. Was the plant isolated from varieties that it might cross with? (yes/no/don't know):
7. Notes on your seed story:

Thank You!
